RESEARCH SUMMARY

Medical AI researcher working with real-world clinical data to develop clinically translatable models. My work spans representation learning, biological aging assessment, and domain shift adaptation, with the broader goal of building AI systems that remain clinically meaningful and reliable beyond retrospective benchmark settings.

EDUCATION

Seoul National University

Ph.D. Candidate in Bioengineering (Expected Feb. 2027)

Seoul, Korea

Mar. 2023 – Present

Peking University

B.S. in Psychological and Cognitive Sciences

Beijing, China

Sep. 2016 – Jul. 2020

RESEARCH EXPERIENCE

Seoul National University Hospital (SNUH)

Medical AI Researcher

Ph.D. Research Collaboration with SNUH

Seoul, Korea

Nov. 2021 – Feb. 2023

Mar. 2023 – Present

Developed medical AI models from real-world clinical data in close collaboration with clinicians.

Korea Institute of Science and Technology (KIST)

Research Intern, Brain Science Institute

Seoul, Korea

Aug. 2020 – May 2021

Investigated neural circuits and motor control using in vivo behavioral experiments, optogenetics, and fluorescence imaging.

MANUSCRIPTS UNDER REVIEW / IN REVISION

- [m.4] Retinal Age Gap as a Biomarker of Biological Aging Reflected by Socioeconomic Status and Lifestyle Behaviors. *GeroScience* (in revision, first author).
- [m.3] Skeleton-Guided Progressive Test-Time Adaptation for Thin Curvilinear Structures. *AAAI 2027* (under review, first author).
- [m.2] Integrating RNFL and Fundus Photographs for Differentiation of Glaucomatous and Non-Glaucomatous Optic Neuropathy Using Deep Learning. *Scientific Reports* (in revision).
- [m.1] Age- and Sex-Specific Autism Screening Using Machine Learning Reduction and Conversational Agent Integration. *Translational Psychiatry* (in revision).

PEER-REVIEWED PUBLICATIONS

† co-first author

- [j.9] B. Woo, J. Choi, ..., **B. Jang**, et al. (2026). Prediction of Postoperative Intracerebral Hemorrhage Following Brain Biopsy Using Integrated Statistical and Machine Learning Analyses. *Scientific Reports* (Accepted).
- [j.8] J.R. Song[†], **B. Jang**[†], et al. (2026). Segmentation-Guided Diffusion Model for Retinal OCT Speckle Reduction with Anatomical Structure Preservation. *Scientific Reports*.
- [j.7] **B. Jang**, Y. Ahn, et al. (2026). Clinically Grounded Retinal Representation Learning from Minimal Supervision. *Scientific Reports*.
- [j.6] **B. Jang**, Y. Shin, G. Lee, and Y.-G. Kim (2026). From Static Diagnosis to Dynamic Guidance: Evolution of Artificial Intelligence in Pediatric Neuroimaging. *Journal of Korean Neurosurgical Society*.
- [j.5] J.H. Lee, S.Y. Lee, **B. Jang**, et al. (2026). OCT Biomarkers as Predictors of Treatment Interval in Neovascular Age-Related Macular Degeneration Treated with Intravitreal Aflibercept Using a Treat-and-Extend Regimen. *Scientific Reports*.
- [j.4] **B. Jang**[†], C.H. Lee[†], et al. (2026). Artificial Intelligence-Based Prediction of First Recurrence in Neovascular Age-Related Macular Degeneration with Validation by 19 Experts. *Scientific Reports*.

- [j.1] **B. Jang**[†], S.Y. Lee[†], et al. (2023). Preliminary Analysis of Predicting the First Recurrence in Patients with Neovascular Age-Related Macular Degeneration Using Deep Learning. *BMC Ophthalmology*.

PRESENTATIONS

- [o.7] **B. Jang**, G. Lee, J. Choi, and Y.-G. Kim. “Structure-Preserving Test-Time Adaptation for Cross-Modality Retinal Vessel Segmentation.” *2026 Spring Conference of KoSMI*, Cheongju, Korea.
- [po.3] **B. Jang**, K.H. Bae, and Y.-G. Kim. “Assessment of Systemic Health Using Retinal Age Gap: Development of a Predictive Model and Clinical Applicability.” *2025 Annual Conference of the Korea Society of Artificial Intelligence in Medicine (KoSAIM)*, Korea.
- [o.6] **B. Jang** et al. “Assessment of Systemic Health Using Retinal Age Gap: Development of a Predictive Model and Clinical Applicability” *MICCAI 2025 AMAI Workshop*, Daejeon, Korea. **Best Abstract Award Honorable Mention**.
- [o.5] **B. Jang** et al. “Assessment of Systemic Health Using Retinal Age Gap: Development of a Predictive Model and Clinical Applicability.” *2025 Spring Conference of KoSMI*, Busan, Korea. **Best Paper Award**.
- [o.4] **B. Jang** et al. “Self-Supervised Learning for Mesangial Proliferation Prediction in Digital Pathology.” *The 45th Annual Meeting of the Korean Society of Nephrology (KSN 2025)*, Seoul, Korea.
- [o.3] **B. Jang** and Y.-G. Kim. “Foundation Models in Healthcare: Development, Necessity and Implementation Strategies.” *2025 HIMSS Global Health Conference & Exhibition (HIMSS 2025)*, Las Vegas, NV, USA.
- [o.2] **B. Jang** et al. “The Impact of AI-Assistance on Predicting Recurrence in Neovascular Age-Related Macular Degeneration for Ophthalmologists.” *2023 Fall Conference of KoSMI*, Bundang, Korea. **Best Paper Award**.
- [po.2] **B. Jang** et al. “Development and Validation of Pretrained Model for Fundoscopy-Specific using Large-Scale Images.” *MICCAI 2023 OMIA-X Workshop*, Vancouver, Canada.
- [po.1] **B. Jang** et al. “Predicting the First Recurrence in Patients with Neovascular AMD Using Deep Learning.” *2023 American Society of Retina Specialists (ASRS)*, Seattle, USA. **Poster Award Winner**.
- [o.1] **B. Jang** et al. “Development and Validation of Pretrained Model for Fundoscopy-Specific using Large-Scale Images.” *2023 Spring Conference of KoSMI*, Daegu, Korea. **Best Paper Award**.

AWARDS

- | | | |
|-------|---|------------|
| [a.5] | AI Seoul Tech Graduate Scholarship, Seoul Future Talent Foundation | Nov. 2025 |
| [a.4] | Hana Bank President’s Award, 2024 Digital Wellness Competition | Nov. 2024 |
| [a.3] | 2nd Place, Healthcare AI Learning Platform Challenge 2023, Themes 4 & 6 | Dec. 2023 |
| [a.2] | 3rd Place, Digital Pathology AI Hackathon, CODIPAI Challenge | Oct. 2023 |
| [a.1] | SNUAIMED Excellence Scholarship | 2023, 2024 |

TEACHING & MENTORING

- | | | |
|-------|---|------------|
| [t.5] | Teaching Assistant, Korea Clinical Datathon (KCD) 2025 | Oct. 2025 |
| [t.4] | Student Ambassador, MICCAI 2025 AMAI Workshop | Sep. 2025 |
| [t.3] | Teaching Assistant, Clinical and Healthcare AI Training Programs | 2024, 2025 |
| [t.2] | NVIDIA DLI Ambassador, Deep Learning Institute (DLI) Certified Instructor | 2023–2025 |
| [t.1] | Teaching Assistant, NVIDIA MONAI Bootcamp, HCLS Summit Korea 2022 | May 2022 |

PATENTS

- [p.2] Y.-G. Kim, . . . , **B. Jang**. Controllable Normal-to-Disease Fundus Translation via Factorial Guidance. Korea Patent Application No. 10-2026-0119988, filed June 2026. (*Pending*)
- [p.1] H.-S. Kim, . . . , Y.-G. Kim, **B. Jang**. Method and System for Predicting Information Related to Abdominal Surgery from Medical Image Data. Korea Patent No. 10-2953173, registered April 2026. (*Granted*)

SKILLS

Programming & Frameworks: Python, MATLAB, PyTorch, TensorFlow, MONAI, Hugging Face
Imaging & Methods: Fundus, CT, X-ray, Digital Pathology; Representation Learning, Multimodal Learning, Test-Time Adaptation, Domain Adaptation
